Define the Problem Statements

Date	19 September 2022
Team ID	PNT2022TMID42578
Project Name	Inventory Management Systems for Retailers
Maximum Marks	2 Marks

Problem Statement :

Retail inventory management is the process of ensuring you carry merchandise that shoppers want, with neither too little nor too much on hand. By managing inventory, retailers meet customer demand without running out of stock or carrying excess supply. The System will automatically send an email alert to the retailers if there is no stock found in their accounts. So that they can order new stock.
