

Says

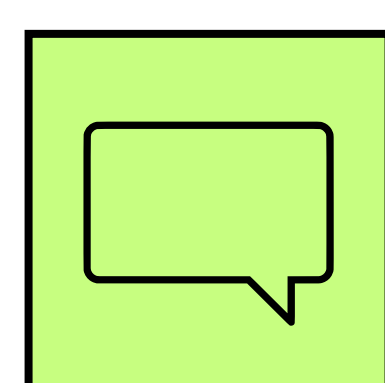

What have we heard them say?
What can we imagine them saying?

Shoppers will
get a notification
once insufficient
of product/
material

Notification
should be in
perfect time and
secure with
shopkeeper

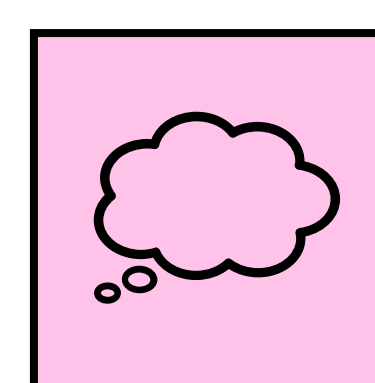

Once the product
gets over/least value
of stock, it
automatically orders
from wholesaler with
a notification to
owner

Monitoring
the datas
collected or
provided

Since it is cloud
based IMS,
internet and
computing
needed

Sendgrid
stack is used
for
notification
purpose

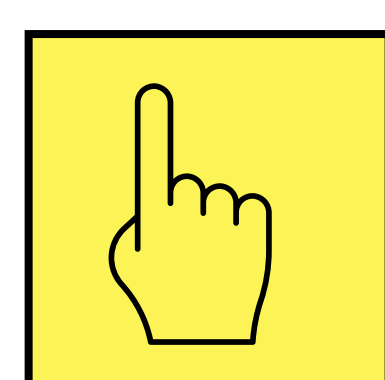

Thinks

What are their wants, needs, hopes,
and dreams? What other thoughts
might influence their behavior?

RFID contains
customer
details with
unique ID

Python for coding,
Flask for framework,
IBM DB2 for
database, Docker for
deliver software,
Kubernetes for
scaling and
management

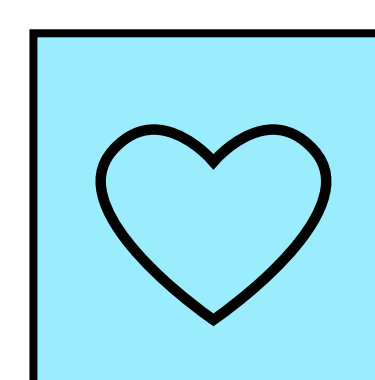

Give them a name and
a portrait to empathize
with your persona.

Owner should
be approve to
continue the
automatic
process of big
deals

Complete
analytics
will be
shown

Compare the
products
with other
wholesalers

While
computing,
data should
be handled
correctly

When using
RFID and
credit based
process, it
gives on trust

Categorisation of
one such product
can be confused
or been
categorised to
others

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and
anxieties? What other feelings might
influence their behavior?
